

We're here when you need us, talk to Dr. Gaul before waiting in the ER!

1.855.266.7243, enter code **3724285# (drgaul)** or email dragaul@onpage.com

The pager is to be used for emergencies outside of office hours by current clients only (having had an office visit in the last 18 months).

An emergency is any acute illness or situation for which you would consider emergency room care. Fevers, vomiting, pain, injury, and children's illnesses – all of these are considered emergencies.

Having the following information ready if applicable:

- Body Temperature and method of measuring
- Know the specific symptoms: runny nose, congestion, sore throat, swollen glands, sore eyes, diarrhea, changes in urination, headache, cough, earache, abdominal or other pain, rash, vomiting, constipation, changes in sleep pattern
- What makes the complaint(s) better or worse: hot/cold applications, rest/movement, open air/closed room, light/dark
- Duration of the symptoms
- Current medications
- What you have already tried /used for this complaint

When we have had the chance to talk to you about your symptoms we may recommend remedies or ask you to follow up for an exam either with us or at another physician's office. It is a great idea to have common remedies on hand in case of an acute illness. We can supply kits and offer courses on taking care of acute complaints. See our website for more information.

Help us keep the service free! You will be billed for non-emergent pager calls. We reserve the right to discontinue pager service at any time for individuals repeatedly abusing the privilege.

How to page

1. Send a detailed email including your phone number to the pager email: dragaul@onpage.com
2. Or call the pager phone **1.855.266.7243**, enter code **372-4285# (drgaul)** and then enter your contact number with area code. You cannot leave a message here, only a number.

Pages will typically be returned within 30 minutes.
